The **RM-300** combines industry-leading 3D scanning software & hardware seamlessly integrated into a pro-grade mobile workstation. The RM-300 provides automated part inspection with ease, efficiency, and the best value/cost ratio compared to alternatives.

Key Features:

- 20-micron accuracy (0.0008 inches)
- No need for powder on dark or shiny surfaces
- 2 million points/second (average cycle time is less than 60 seconds)
- Automatic inspections and reports created in Polyworks
- Standard and customizable scan paths
