according to Regulation (EC) No. 1907/2006 (REACH)

## AESUB green

Version number: 1.0

Date of compilation: 01.06.2023

SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### **Product identifier** 1.1 Trade name

Registration number (REACH) Unique formula identifier (UFI)

### **AESUB** green

not relevant (mixture) GH2C-70CS-X000-FPQ9

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses Uses advised against

coating for particular industrial and professional uses Not recommended for interior use on large surface areas.

(CCN 994267 / WISAG FMO Cargo Service GmbH &

#### 1.3 Details of the supplier of the safety data sheet

Scanningspray Vertriebs GmbH Johann-Strauß-Str. 13 45657 Recklinghausen Germany

e-mail: info@aesub.com Website: www.aesub.com

e-mail (competent person)

#### 1.4 **Emergency telephone number**

liese@aesub.com (Max Liese)

#### 2.1 Classification of the substance or mixture

Classification according to Regulation (EC) No 1272/2008 (CLP)

| Section | Hazard class  | Category | Hazard class and cat-<br>egory | Hazard state-<br>ment |
|---------|---|----------|--------------------------------|-----------------------|
| 2.6     | flammable liquid  | 2        | Flam. Liq. 2                   | H225                  |
| 3.2     | skin corrosion/irritation   | 2        | Skin Irrit. 2                  | H315                  |
| 3.3     | serious eye damage/eye irritation   | 2        | Eye Irrit. 2                   | H319                  |
| 3.8D    | specific target organ toxicity - single exposure (narcotic effects, drowsiness) | 3        | STOT SE 3                      | H336                  |
| 3.10    | aspiration hazard   | 1        | Asp. Tox. 1                    | H304                  |
| 4.1C    | hazardous to the aquatic environment - chronic hazard                           | 2        | Aquatic Chronic 2              | H411                  |

Co. KG)

For full text of abbreviations: see SECTION 16.

The most important adverse physicochemical, human health and environmental effects

The product is combustible and can be ignited by potential ignition sources. Spillage and fire water can cause pollution of watercourses.

according to Regulation (EC) No. 1907/2006 (REACH)

# **AESUB** green

Version number: 1.0

Date of compilation: 01.06.2023

### 2.2 Label elements

Labelling according to Regulation (EC) No 1272/2008 (CLP)

- Signal word danger
- Pictograms

GHS02, GHS07, GHS08, GHS09

| - Hazard statements |  |
|---------------------|--|
| H225                | Highly flammable liquid and vapour.              |
| H304                | May be fatal if swallowed and enters airways.    |
| H315                | Causes skin irritation.                          |
| H319                | Causes serious eye irritation.                   |
| H336                | May cause drowsiness or dizziness.               |
| H411                | Toxic to aquatic life with long lasting effects. |
|                     |  |

Precautionary statements

| - Precautionary stater | nents  |
|------------------------|--|
| P210                   | Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. |
| P301+P310              | IF SWALLOWED: Immediately call a POISON CENTER/doctor.   |
| P331                   | Do NOT induce vomiting.  |
| P370+P378              | In case of fire: Use sand, carbon dioxide or powder extinguisher to extinguish.                |
| P403+P233              | Store in a well-ventilated place. Keep container tightly closed.                               |
| P403+P235              | Store in a well-ventilated place. Keep cool.   |
|                        |  |

- Hazardous ingredients for labelling

Hydrocarbons, C6-C7, isoalkanes, cyclics, <5% nhexane, Hydrocarbons, C6-C7, n-alkanes, isoalkanes, cyclics, <5% n-hexane, Hydrocarbons, C7, n-alkanes, isoalkanes, cyclics, Hydrocarbons, C6, isoalkanes, <5% n-hexane

### 2.3 Other hazards

There is no additional information.

Results of PBT and vPvB assessment

Does not contain a PBT-/vPvB-substance in a concentration of  $\ge 0,1\%$ .

#### Endocrine disrupting properties

Does not contain an endocrine disruptor (EDC) in a concentration of  $\ge 0,1\%$ .

### **SECTION 3: Composition/information on ingredients**

#### 3.1 Substances

Not relevant (mixture)

### 3.2 Mixtures

according to Regulation (EC) No. 1907/2006 (REACH)

# **AESUB** green

Version number: 1.0

Date of compilation: 01.06.2023

### Description of the mixture

For full text of abbreviations: see SECTION 16.

### **SECTION 4: First aid measures**

### 4.1 Description of first aid measures

#### General notes

Do not leave affected person unattended. Remove victim out of the danger area. Keep affected person warm, still and covered. Take off immediately all contaminated clothing. In all cases of doubt, or when symptoms persist, seek medical advice. In case of unconsciousness place person in the recovery position. Never give anything by mouth.

#### Following inhalation

If breathing is irregular or stopped, immediately seek medical assistance and start first aid actions. In case of respiratory tract irritation, consult a physician. Provide fresh air.

#### Following skin contact

Wash with plenty of soap and water. Take off contaminated clothing. Thaw frosted parts with lukewarm water. Do not rub affected area.

#### Following eye contact

Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart. Remove contact lenses, if present and easy to do. Continue rinsing.

#### Following ingestion

Rinse mouth with water (only if the person is conscious). Do NOT induce vomiting.

### 4.2 Most important symptoms and effects, both acute and delayed

Narcotic effects.

#### 4.3 Indication of any immediate medical attention and special treatment needed

none

according to Regulation (EC) No. 1907/2006 (REACH)

## **AESUB** green

Version number: 1.0

Date of compilation: 01.06.2023

### **SECTION 5: Firefighting measures**

#### 5.1 Extinguishing media

Suitable extinguishing media

Water spray, BC-powder, Carbon dioxide (CO2)

Unsuitable extinguishing media

Water jet

### 5.2 Special hazards arising from the substance or mixture

In case of insufficient ventilation and/or in use, may form flammable/explosive vapour-air mixture. Solvent vapours are heavier than air and may spread along floors. Places which are not ventilated, e.g. unventilated below ground level areas such as trenches, conduits and shafts, are particularly prone to the presence of flammable substances or mixtures.

#### Hazardous combustion products

Carbon monoxide (CO), Carbon dioxide (CO2)

#### 5.3 Advice for firefighters

In case of fire and/or explosion do not breathe fumes. Co-ordinate firefighting measures to the fire surroundings. Do not allow firefighting water to enter drains or water courses. Collect contaminated firefighting water separately. Fight fire with normal precautions from a reasonable distance.

### **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Follow emergency procedures such as the need to evacuate the danger area or to consult an expert. Remove persons to safety.

#### For emergency responders

Wear breathing apparatus if exposed to vapours/dust/spray/gases. Personal protective equipment shall be used when the risks cannot be avoided or sufficiently limited by technical means of collective protection or by measures, methods or procedures of work organization.

#### 6.2 Environmental precautions

Keep away from drains, surface and ground water. Retain contaminated washing water and dispose of it. If substance has entered a water course or sewer, inform the responsible authority.

#### 6.3 Methods and material for containment and cleaning up

Advice on how to contain a spill

Covering of drains

#### Advice on how to clean up a spill

Wipe up with absorbent material (e.g. cloth, fleece). Collect spillage: sawdust, kieselgur (diatomite), sand, universal binder

#### Appropriate containment techniques

Use of adsorbent materials.

### Equipment required for containment/clean-up

Non-sparking tools and equipment, Collecting basins for spills, Personal protective equipment

#### Other information relating to spills and releases

Place in appropriate containers for disposal. Ventilate affected area.

according to Regulation (EC) No. 1907/2006 (REACH)

## **AESUB** green

Version number: 1.0

Date of compilation: 01.06.2023

#### 6.4 Reference to other sections

Hazardous combustion products: see section 5. Personal protective equipment: see section 8. Incompatible materials: see section 10. Disposal considerations: see section 13.

#### **SECTION 7: Handling and storage**

#### 7.1 Precautions for safe handling

#### Recommendations

#### - Measures to prevent fire as well as aerosol and dust generation

Use local and general ventilation. Avoidance of ignition sources. Keep away from sources of ignition - No smoking. Take precautionary measures against static discharge. Use only in well-ventilated areas. Due to danger of explosion, prevent leakage of vapours into cellars, flues and ditches. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting/equipment. Use only non-sparking tools.

#### - Specific notes/details

Places which are not ventilated, e.g. unventilated below ground level areas such as trenches, conduits and shafts, are particularly prone to the presence of flammable substances or mixtures. Vapours are heavier than air, spread along floors and form explosive mixtures with air.

#### Advice on general occupational hygiene

Wash hands after use. Do not eat, drink and smoke in work areas. Remove contaminated clothing and protective equipment before entering eating areas. Never keep food or drink in the vicinity of chemicals. Never place chemicals in containers that are normally used for food or drink. Keep away from food, drink and animal feedingstuffs.

#### 7.2 Conditions for safe storage, including any incompatibilities

Managing of associated risks

- Explosive atmospheres

Keep container tightly closed and in a well-ventilated place. Use local and general ventilation. Keep cool. Protect from sunlight.

- Corrosive conditions

Protect from moisture.

#### - Flammability hazards

Keep away from sources of ignition - No smoking. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Take precautionary measures against static discharge. Protect from sunlight.

#### - Ventilation requirements

Use local and general ventilation. Ground/bond container and receiving equipment.

- Packaging compatibilities

Only packagings which are approved (e.g. acc. to ADR) may be used.

- Storage class (LGK) - TRGS 510

LGK 3 (flammable and desensitizing explosive liquids)

#### 7.3 Specific end use(s)

Coating for particular industrial and professional uses

according to Regulation (EC) No. 1907/2006 (REACH)

# **AESUB** green

#### 8.2 Exposure controls

Appropriate engineering controls

General ventilation.

Individual protection measures (personal protective equipment)

Personal protective equipment shall be used when the risks cannot be avoided or sufficiently limited by technical means of collective protection or by measures, methods or procedures of work organization.

#### Eye/face protection

Wear eye/face protection.

Skin protection

#### - Hand protection

Butyl rubber; Layer thickness: 0.7 mm; Break through time: 240 min. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves. Chemical protection gloves are suitable, which are tested according to EN 374. Check leak-tightness/impermeability prior to use. Do not wear gloves near rotary machines or tools. In the case of wanting to use the gloves again, clean them before taking off and air them well.

#### - Other protection measures

Take recovery periods for skin regeneration. Preventive skin protection (barrier creams/ointments) is recommended. Wash hands thoroughly after handling.

#### Respiratory protection

During spraying wear suitable respiratory equipment. [In case of inadequate ventilation] wear respiratory protection. Type: AX (gas filters and combined filters against low-boiling point organic compounds, colour code: Brown).

#### Environmental exposure controls

The disposal by sewage disposal systems is generally not allowed.

### **SECTION 9: Physical and chemical properties**

#### 9.1 Information on basic physical and chemical properties

| Physical state   | liquid liquid, solid, gaseous   |
|--|---|
| Colour   | not determined  |
| Odour  | characteristic  |
| Melting point/freezing point                             | not determined  |
| Boiling point or initial boiling point and boiling range | 58 °C at 101.3 kPa  |
| Flammability   | flammable liquid in accordance with GHS criteria                                      |
| Lower and upper explosion limit                          | 0.6 vol% - 13.5 vol%  |
| Flash point  | -20 °C at 101.3 kPa<br>calculated value, referring to a component of the mix-<br>ture |
| Auto-ignition temperature                                | $225~^\circ C$ (auto-ignition temperature (liquids and gases))                        |
| Decomposition temperature                                | not relevant  |
| pH (value)   | not determined  |
| Kinematic viscosity                                      | not determined  |
| Solubility(ies)  | not determined  |
|  |   |

### SECTION 10: Stability and reactivity

### 10.1 Reactivity

Concerning incompatibility: see below "Conditions to avoid" and "Incompatible materials". The mixture contains reactive substance(s). Risk of ignition.

If heated:

Risk of ignition

### 10.2 Chemical stability

See below "Conditions to avoid".

### **10.3** Possibility of hazardous reactions

No known hazardous reactions.

#### 10.4 Conditions to avoid

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

Hints to prevent fire or explosion

Use explosion-proof electrical/ventilating/lighting/equipment. Use only non-sparking tools. Take precautionary measures against static discharge.

### 10.5 Incompatible materials

Oxidisers

### 10.6 Hazardous decomposition products

Reasonably anticipated hazardous decomposition products produced as a result of use, storage, spill and heating are not known. Hazardous combustion products: see section 5.

### **SECTION 11: Toxicological information** Information on hazard classes as defined in Regulation (EC) No 1272/2008 11.1 Test data are not available for the complete mixture. Classification procedure The method for classification of the mixture is based on ingredients of the mixture (additivity formula). Classification according to GHS (1272/2008/EC, CLP) Acute toxicity Shall not be classified as acutely toxic. Skin corrosion/irritation Causes skin irritation. Serious eye damage/eye irritation Causes serious eye irritation. Respiratory or skin sensitisation Shall not be classified as a respiratory or skin sensitiser. Germ cell mutagenicity Shall not be classified as germ cell mutagenic. Carcinogenicity Shall not be classified as carcinogenic. Reproductive toxicity Shall not be classified as a reproductive toxicant. Specific target organ toxicity - single exposure May cause drowsiness or dizziness. Specific target organ toxicity - repeated exposure Shall not be classified as a specific target organ toxicant (repeated exposure). Aspiration hazard May be fatal if swallowed and enters airways. 11.2 Information on other hazards There is no additional information. **SECTION 12: Ecological information** 12.1 Toxicity Toxic to aquatic life with long lasting effects. ### 12.4 Mobility in soil

Data are not available.

### 12.5 Results of PBT and vPvB assessment

According to the results of its assessment, this substance is not a PBT or a vPvB. Does not contain a PBT-/vPvB-substance in a concentration of  $\geq$  0,1%.

### 12.6 Endocrine disrupting properties

Does not contain an endocrine disruptor (EDC) in a concentration of  $\ge 0,1\%$ .

### 12.7 Other adverse effects

Data are not available.

### **SECTION 13: Disposal considerations**

### 13.1 Waste treatment methods

The disposal by sewage disposal systems is generally not allowed.

Waste treatment-relevant information

Solvent reclamation/regeneration.

#### Sewage disposal-relevant information

Do not empty into drains. Avoid release to the environment. Refer to special instructions/safety data sheets.

#### Waste treatment of containers/packagings

It is a dangerous waste; only packagings which are approved (e.g. acc. to ADR) may be used. Completely emptied packages can be recycled. Handle contaminated packages in the same way as the substance itself.

#### Relevant provisions relating to waste

List of wastes

14 06 03

#### Remarks

Please consider the relevant national or regional provisions. Waste shall be separated into the categories that can be handled separately by the local or national waste management facilities.

### Key literature references and sources for data

Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures. Regulation (EC) No. 1907/2006 (REACH), amended by 2020/878/EU.

Transport of dangerous goods by road, rail and inland waterway (ADR/RID/ADN). International Maritime Dangerous Goods Code (IMDG). Dangerous Goods Regulations (DGR) for the air transport (IATA).

#### **Classification procedure**

Physical and chemical properties: The classification is based on tested mixture. Health hazards, Environmental hazards: The method for classification of the mixture is based on ingredients of the mixture (additivity formula).

#### List of relevant phrases (code and full text as stated in section 2 and 3)

| Code | Text   |  |
|------|--|--|
| H225 | Highly flammable liquid and vapour.                                |  |
| H304 | May be fatal if swallowed and enters airways.                      |  |
| H315 | Causes skin irritation.  |  |
| H319 | Causes serious eye irritation.                                     |  |
| H336 | May cause drowsiness or dizziness.                                 |  |
| H361 | Suspected of damaging fertility or the unborn child.               |  |
| H373 | May cause damage to organs through prolonged or repeated exposure. |  |
| H400 | Very toxic to aquatic life.  |  |
| H410 | Very toxic to aquatic life with long lasting effects.              |  |
| H411 | Toxic to aquatic life with long lasting effects.                   |  |
| H413 | May cause long lasting harmful effects to aquatic life.            |  |
