SIMSCAN, the only hand-sized 3D scanner in the market so far, is a disruptive innovation of the traditional 3D scanners' structure and a revolutionary product in 3D optical metrology industry.

No matter in narrow spaces, or under huge objects, SIMSCAN performs high-quality 3D scanning without any restriction of working environment. Metrology-grade measurement system helps capture every detail and construct 3D model in a very short time. Designed under minimalism, the metal shell enables SIMSCAN to achieve a balance between weight and performance.

### Detail, Everywhere

Under parallel blue laser mode or single line deep hole mode, every detail is nowhere to hide, even for scanning complex surface.

### **Smooth 3D Experience**

11 crossed blue lasers, 2,020,000 measurements/s and 410\*400 mm scanning area bring smooth and efficient 3D digitizing experience.

# **Single-handed Control**

Weighted only 570 g and sized by  $203 \times 80 \times 44$  mm, SIMSCAN brings unparalleled simpleness for scanning anything with one hand.

#### Ultra-portable

No matter in narrow spaces, or under huge objects, the remarkable portability of SIMSCAN enables it to proceed 3D measurement anywhere and anytime.
