

The right coat for every scan.

Glossy, dark, and transparent surfaces scatter light and corrupt scan data. AESUB sprays lay down a thin, even matte coat so your scanner captures every detail. The vanishing formulas sublime on their own, with no residue to clean.

+ COMPARE THE LINEUP

SPRAY	BEST FOR	SCAN WINDOW	FULLY EVAPORATES	LAYER	PIGMENT	CAN
Aesub Blue VANISHING	Everyday all-rounder for most materials and general scanning.	1-2 hrs	4 hrs	8-15 µm	White	13.5 oz
Aesub Violet VANISHING	Finer coat and a longer working window for detailed parts.	2-6 hrs	24 hrs	4-8 µm	White	13.5 oz
Aesub Orange VANISHING	Fine layer for high detail across longer scan sessions.	4-8 hrs	12-24 hrs	2-6 µm	White	13.5 oz
Aesub Diamond VANISHING	Ultra-fine 2 µm coat for top precision and small parts.	10 min	15-30 min	2 µm	White	6.8 oz
Aesub Transparent VANISHING	Leaves no white pigment, so color and texture stay visible.	1-2 hrs	4 hrs	15-20 µm	Transparent	13.5 oz
Aesub White PERMANENT	Permanent matte coat with unlimited working time.	Unlimited	Never	7 µm	White	13.5 oz

VANISHING Self-subliming. Evaporates completely and leaves **no residue to wipe off.**

PERMANENT Stays matte until removed. Best for long or **repeated scanning jobs.**

+ A **thinner layer** captures finer detail. Choose by surface, precision, and scan time.
