

Precision, Captured.

We turn complex physical objects into precise digital data, giving your team the accuracy and clarity to design, manufacture, and inspect with confidence.

+ WHAT WE DO

3D Scanners

Handheld, desktop, and long-range systems from Artec 3D and Scanology.

Software

Reverse engineering, inspection, and metrology software matched to your workflow.

Engineering Services

On-demand 3D scanning, CAD modeling, inspection, and reverse engineering.

Spray & Accessories

The #1 US source for AESUB scanning sprays, plus targets, turntables, and cases.

+ FEATURED 3D SCANNERS

ARTEC 3D

- **Leo** · standalone handheld
- **Eva** · fast structured light
- **Point** · metrology laser
- **Spider II** · ultra-high resolution
- **Ray II** · long-range LiDAR
- **Micro II** · desktop, 5-micron
- **Jet** · mobile SLAM LiDAR

SCANOLGY

- **SIMSCAN 42** · palm-sized portable
- **SIMSCAN-S Gen2** · palm-sized, 0.015 mm
- **SIMSCAN-E** · compact wireless
- **KSCAN-X** · large-part wireless
- **KSCAN-E** · wireless all-in-one
- **KSCAN-Magic II** · composite laser
- **TrackScan Sharp-S** · scanner + tracker
- **TrackScan-Sharp** · i-Scanner + i-Tracker
- **NimbleTrack** · wireless system
- **NimProbe** · optical probing
- **TrackProbe** · tracked probing
- **AccuArm** · portable CMM

+ WHY DIGITIZE DESIGNS

Brand-agnostic guidance

We match you to the right solution for your parts and tolerances, not a single-brand pitch.

Expertise in-house

Buy the equipment or hand us the project. Scanning, CAD, and inspection on demand.

Support that lasts

Training, protection plans, and a direct line to real experts long after the sale.
